

Pre-empting the airwaves and showing propaganda is not American. If you do not work to stop this travesty by the Sinclair Broadcast Group, you are supporting this behavior. Their broadcast can not be compared to Fahrenheit 9/11 because the marketplace, through ticket sales, decided who would see the movie. When a national broadcast network is used to show a one-sided propaganda piece, this is not the power of the marketplace, it is the power of the media moguls trying to shape public opinion for their own gain. Either you're for America or you're against it. You decide.
